

HTML5 and CSS3 Grid Layout Assignment (Responsive web design)

Create HTML5 template consists of 4 main panels (each with its associated sub-panels) as described below

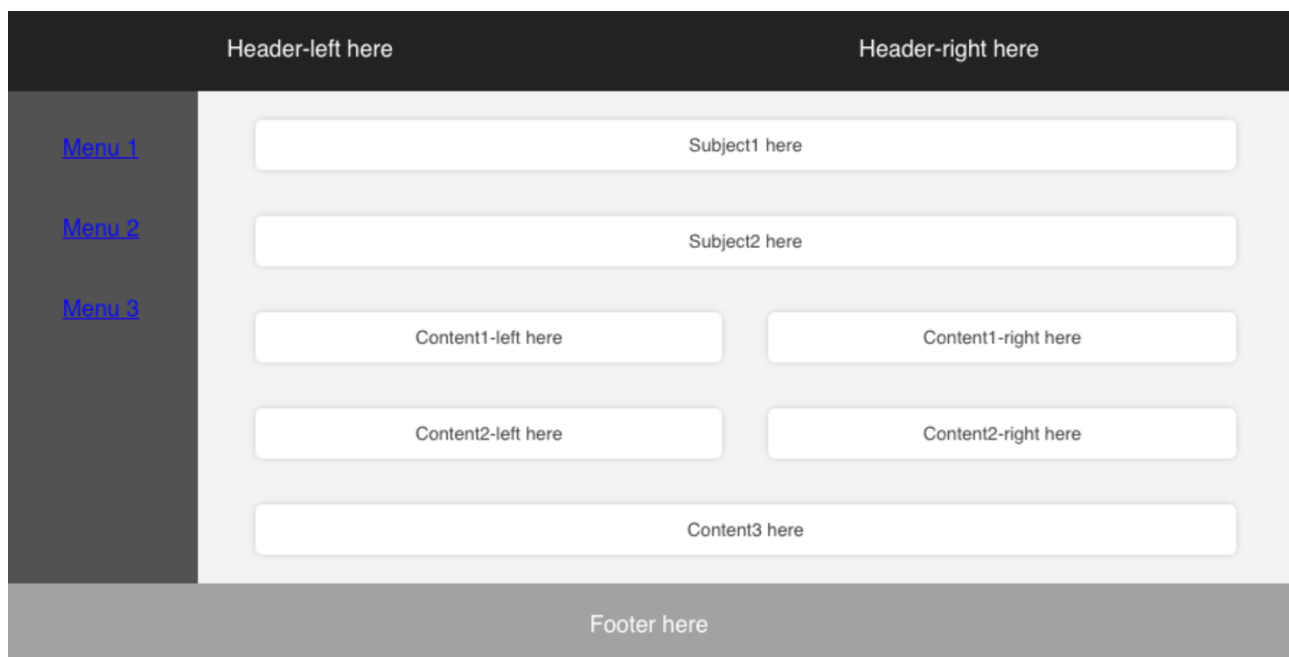

- [1] Header
 - Divided into left & right panel
- [2] Footer
- [3] Sidebar
 - Three menu bars
- [4] Content
 - Two subject panels
 - Two content panels divided into left & right
 - Another content panel

The mobile view is nearly identical – however, below are the small differences to account for the smaller display :

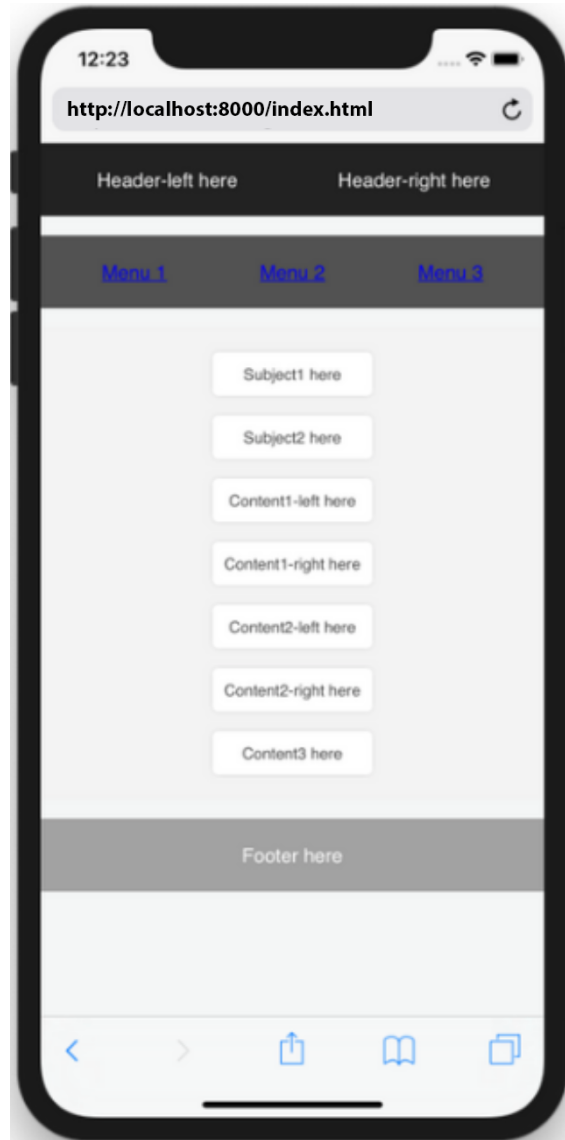

Sidebar – Positioned below the header as another row, with menus side-by-side (instead of vertical)

Content – All positioned row-by-row (even left & right panels)

Create web page given as following screen which supports responsive design which arranges screen layout as per the device size like desktop or mobile.(you may use simple css or bootstrap css library as per your choice)

Desktop view

Mobile view
